Numeracy and maths	<p><u>Counting forwards and backwards by 10s</u> Worksheet on SEESAW Hit the Button https://www.topmarks.co.uk/maths-games/hit-the-button</p>	<p><u>Sequencing and Naming Decade Numerals beyond 100</u> Worksheet on SEESAW 10 minutes of SUMDOG</p>	<p><u>Decrementing by Tens and Ones</u> Worksheet on SEESAW 10 minutes of SUMDOG</p>	<p><u>Adding to a decade: 6-9</u> Task: <u>The answer is 100.</u> <u>How many different sums can you make that equal 100? Make a colourful poster with your sums.</u> 10 minutes of SUMDOG</p>	<p><u>Determining the number in each group</u> Worksheet on SEESAW 10 minutes of SUMDOG</p>
How to teach lesson.	<ul style="list-style-type: none"> • Make bundles of 10 using e.g. straws, cocktail sticks. • Say "I am going to put out the bundles of ten one at a time. Count by tens as I put out the bundles. (10,20,30,...100)." • Say "This time, count backwards by tens, from 100, as I remove the bundles. Ready, go! (100,90,...10)." • Say "This time, count forwards and backwards by 10s to 50 without the bundles. Ready, go!" 	<ul style="list-style-type: none"> • <i>Decade Numbers to 1000</i> • Place out numeral cards for decade numbers from 610 to 700, in random order. Say "Put these cards in order from left to right." Similarly, for other hundreds. • Place out numeral cards for decade numbers 360 to 450, in random order. Say "Put these cards in order from left to right. Read the numbers from left to right." 	<ul style="list-style-type: none"> • Make bundles of 10 using e.g. straws, cocktail sticks. • Use single straws for sticks (ones). • Display 9 bundles and 6 sticks. Say "How many sticks are there?" Place a screen over the 9 bundles and 6 sticks, and remove 2 bundles. Say "How many sticks now?" • Remove 1 bundle and 1 stick. Say "How many sticks now? Check to see if you are correct?" • Remove 2 bundles. Say "How many sticks now?" 	<ul style="list-style-type: none"> • <i>You will need 10 frames</i> • Place out 5 ten (10 dot) frames and a ten (2 dot) frame. Say "How many dots are there altogether? How many more to make 60?" • Briefly display and then screen 2 ten (10 dot) frames and a ten (4 dot) frame. Say "How many dots are there altogether? How many more dots to make 30?" • Briefly display and then screen 4 ten (10 dot) frames and a ten (1 dot) 	<ul style="list-style-type: none"> • <i>You will need a set of 2,3,4 and 5 dot cards</i> • Place seven 2-dot cards under a screen. Say "There are 7 cards and 14 dots altogether. What is the number on each card?" • Similarly, 3 cards and 15 dots (three 5-dot cards), 4 cards and 8 dots (four 2-dot cards) and so on.

	<p>(10,20...50), (50, 40,....10)."</p> <ul style="list-style-type: none">• Say "This time, count forwards and backwards by tens to 100 without the bundles. Ready, go! (10,20....100), (100, 90,.....10)."	<p>Similarly, for other sequences of 10 decade cards.</p>	<p>Check to see if you are correct."</p> <ul style="list-style-type: none">• Remove 1 bundle and 3 sticks. Say "How many sticks now? Check to see if you are correct."• Continue with similar examples.	<p>frame. Say "How many dots are there altogether? How many more dots to make 50?"</p> <ul style="list-style-type: none">• Continue with similar examples. <p><i>NB. Encourage your child to count using strategies other than counting in ones.</i></p>
